Technical Skills

Python (Pandas, NumPy, Matplotlib, Statsmodels)
SQL
Data Cleaning & Wrangling
Exploratory Data Analysis (EDA)
Statistical Modelling
Data Visualisation
Excel
RapidMiner

Football-Relevant skills

Performance data analysis
Injury & return-to-sport modelling
Understanding of GPS, tracking & event data
Knowledge of scouting metrics & football KPIs

Football Background

10 years of competitive football
(Regional 1 – Occitanie)
Regional 1 Champion (Occitanie)
Best Regional 1 U17 Defender (2022)
Volunteer referee
Football Supervisor — [Bloomdays](#), 2021
Oral exam: *Application of Mathematics to Big Data in Football* (18/20)

Languages

French: native
English: professional proficiency
Spanish: intermediate
Mandarin: beginner

Other experience

Retail Assistant — Super U
Admission Officer — Audencia
Team Member — McDonald's

Additional Certificate

Level 1 Civic First Aid & Prevention

Thomas Guibert

Football Data Analyst - Performance & Data Engineering Final-year BBA student specialising in Data & AI, with hands-on experience in sports analytics

Seeking a **6-month internship (Feb-July 2027)** in Football Data Analytics / Performance Data / Data Engineering.

Experience in Football Data & Sports Analytics

Data Scientist Intern

From Jun. 2024 to Aug. 2024 [KINESPORT / MEDINETIC LEARNING](#) Lyon

Kinesport / Medinetic Learning (11Stadium R&D Centre)

- Analysed a performance database of **2 088 athlete assessments**, **266 variables** and **555 674 data points** to identify predictors of return-to-sport readiness after ACL reconstruction
- Cleaned, merged and standardised two historical datasets, creating a unified structure and a temporal segmentation ("B" vs "P": **1 491 vs 589 patients**)
- Executed a full statistical pipeline: 104 descriptive statistics, 103 normality checks, 134 comparison tests, 47 correlation visuals, 18 post-hoc analyses and 28 regression-based studies
- Built 27 descriptive visualisations to support interpretation
- Identified functional and psychological factors influencing **K-STARTS scores** (7 physical tests + ACL-RSI)
- Presented insights to support evidence-based rehabilitation and performance optimisation.

Experience in Data Engineering & Governance

Intern Engineer in Data Management & Governance

From May 2026 to Aug. 2026 [CAPGEMINI TECHNOLOGY SERVICES](#) Toulouse, Blagnac
[Within the Skywise Data Exchange team \(AIRBUS, Palantir Foundry ecosystem\):](#)

- Contributed to **Airbus Skywise**, a global aviation data platform leveraging AI and analytics to improve operational decision-making
- Used **Palantir Foundry** to qualify datasets, review data pipelines and support data governance processes
- Structured and validated **5 operational datasets** into production-ready data products, improving data quality, lineage and metadata management
- Audited **5 data pipelines** and produced technical documentation to enhance reliability, consistency and long-term maintainability

Football relevance: Transferable data engineering experience applicable to GPS, tracking, event and scouting datasets.

Additional Projects

Junior Digital Strategy Analyst - Student project

From Feb. 2026 to Mar. 2026 [SAVEFOLIO](#) Nantes

- Audited the digital presence and competitive landscape of a referral-tech startup
- Built a digital marketing strategy (SEO, content, social media)

Education

Bachelor of Business Administration Data, AI & Management

From Sept. 2023 to Jun. 2027 [AUDENCIA & CENTRALE NANTES](#) Nantes, France

English track / Accreditations: CTI, EUR-ACE, EQUIS, AACSB, AMBA • Centrale Nantes Top 250 • Audencia triple-accredited

Machine Learning, Deep Learning, Business-oriented Artificial Intelligence; Algorithms and Scientific Computing; IoT and Big Data applications for Supply Chain & Operations; High Performance Computing; Business Intelligence and AI-driven Decision Making; Innovation in Data-driven Business

International Academic Semesters (as part of the BBA)

From Feb. 2025 to Jan. 2026

- **FinTech & emerging technologies** : FinTech, Internet of Things, blockchain, Chinese market, business analytics - [SHENZHEN UNIVERSITY](#) - China (Aug. 2025 → Jan. 2026)
- **Data & AI** : AI & data mining for digital business, machine & deep learning, NLP, scientific visualization, information systems security - [CENTRALE CASABLANCA](#) - Morocco (Feb. 2025 → May 2025)
